

COMPASS GROUP FACT SHEETS ON OUR VALUE ADD TO THE MOE SCHOOL LUNCHES PROGRAMME

WASTAGE & SUSTAINABILITY RESPONSIBILITY

As one of New Zealand's largest food service providers we recognise our responsibility for a healthier planet by our implementing sustainability initiatives. We have ensured all our packaging is 100% decomposable and biodegradable and have worked with the local council to provide bins appropriate for wastage. We have even gone beyond that and have partnered with specific sustainability food waste service providers to reduce our environmental impact.

By working closely with the parents, teachers and students in regard to the menu design based on ongoing feedback have been able to increase the 'eatability ratio' of our meals and therefore have reduced overall wastage!

Compass Group also ensures all our food is locally sourced within New Zealand to reduce our carbon footprint and support local food growers and producers.

Did you know some schools even use the food waste in their own veggie compost gardens and some are donated to a local pig farm!

Did you know even the sealable lid is compostable as well as the bags?
