

COMPASS GROUP FACT SHEETS ON OUR VALUE ADD TO THE MOE SCHOOL LUNCHES PROGRAMME

SAFFRON ALLERGEN MANAGEMENT TOOL

Compass Group uses Saffron Allergen Management and Nutritional Analysis software to ensure we capture each and every child's dietary requirements to be able to provide them a suitable meal. This tool allows us to capture the correct nutritional data into our delicious recipes and ensures we get all the ingredients just right.

Did you know we have 900 students out of the 11,600 student population we serve who require special dietary meals? Of these, 360 students required even more particular dietary needs outside of the traditional dietary requirements of vegan, vegetarian, gluten free etc. that we have created an entirely new suitable meal for. We have 27 variations of the menu each day to accommodate to those special dietaries. Now that's dedication!

COMPASS GROUP DELIVERING OUTSTANDING
HEALTHY AND NUTRITIOUS SCHOOL LUNCHES
